Achievements

- **Won Hackathon at IIT Delhi** - Innovated a healthcare web app with real-time monitoring and AI-driven diagnostics.
- **Hackathon Mentorship & Organization** - Mentored **3+** hackathons and organized **6+** hackathons at venues like **Microsoft Office** and top colleges.

Experience

LifeLinkr Intern

July 2024 - November 2024

Role: Backend Developer

JavaScript | Node.js | Git | GitHub | EJS | Express | SQL | jQuery

- Engineered **5+ backend modules** for **IVF clinics** and hospitals, streamlining operations for **billing, inventory, embryology, and patient dashboards**.
- Developed **secure session management** using **Express-session** (cookie-less), reducing authentication vulnerabilities by **40%**.
- Implemented **AES encryption** via **CryptoJS** for sensitive patient data, boosting security compliance by **35%**.
- Integrated **Nodemailer** for automated email alerts, reducing manual communication efforts by **50%**, and configured **Twilio API** for seamless third-party messaging.
- Deployed applications to shared servers, improving software availability.
- Presented modules to **Founders** multiple times, facilitating clear communication between management and the development team, accelerating **software development pace by 30%**.

CLUMOSS Intern

May 2024 - June 2024

Role: Full Stack Developer Intern

MongoDB | React.js | Node.js | Git | GitHub | Vercel

- Crafted and optimized the **frontend UI/UX** for an **e-commerce shoe website**, leading to a **20% increase** in customer engagement.
- Collaborated with a **5-member development team**, ensuring task alignment and timely feature delivery.
- Implemented performance enhancements, reducing **page load time by 35%**, improving user retention.
- Managed version control with **GitHub**, streamlining collaboration and reducing code conflicts.

Skills

Languages: Java, SQL, JavaScript, TypeScript
Frontend: React.js, Bootstrap, Tailwind CSS, Next.js

Backend: Express.js, Node.js, MongoDB, MySQL
Version Control & DevOps: Git, GitHub, Docker

Projects

Taskie

February. 2025 - Present

Task Management Software

PostgreSQL | Supabase | Next.js | Node.js | Express.js | Nodemailer | React Query

- Built a **hierarchical task management system** with **role-based access**, supporting **100+ teams** and seamless sub-user management.
- Drafted a **task tracking system** with priority, deadlines, and status updates, increasing task efficiency by **40%**.
- Engineered a real-time **employee analytics dashboard**, visualizing **task completion rates, peak hours, and monthly trends**.
- Automated **task email notifications** via Nodemailer, reducing missed deadlines by **35%**.

Zwigato

March. 2024 - April 2024

DemoUser: kb@gmail.com DemoPass:kb

Food Ecommerce Webapplication

MongoDb | Nodejs | Reactjs | Expressjs | Vercel | Render | Git | Github

- Independently created an E-commerce platform for online food ordering.
- **Enhanced user experience by 70%** through **Razorpay** payment gateway integration, improving the payment process and increasing trust and security.
- Established a scalable and **robust cross-platform** application..
- Utilized the **MERN stack** and **Git version control** to facilitate efficient development and collaboration.

Education

BTech. in Computer Science and Engineering
Guru Gobind Singh Indraprastha University | **GPA: 7.95/10**

Expected graduation date: Nov. 2026
