Experience

LifeLinkr Intern   July 2024 - September 2024
Role: Backend Developer   *JavaScript | Nodejs | Git | Github | EJS | Express | SQl | Jquery*

- Developed **comprehensive backend solutions for IVF clinics** and medical hospitals, integrating **modules for billing, inventory, embryology, patient configuration, and dashboards.**
- Implemented advanced features such as **Express-session** for **secure session management without cookies**, enhancing user data security.
- Employed **CryptoJS** for robust data encryption and decryption, improving data security and enhancing **user satisfaction by 40%**
- Implemented robust **backend and frontend validations** to enhance website security.
- Integrated **Nodemailer** for user **email notifications** and implemented **Twilio** API for seamless third-party communication services.
- Gained hands-on experience in **deploying applications to shared servers**, contributing to the accessibility and efficiency of the software.

CLUMOSS Intern   May 2024 - Jun 2024
Role: Full Stack Developer Intern   *Mongodb | Reactjs | Nodejs | Git | Github | Vercel*

- Successfully created and optimized the **frontend of an e-commerce shoe website**, ensuring it met **client requirements** and enhanced user experience.
- Collaborated closely with a diverse team, learning and **applying leadership skills to coordinate tasks** and ensure smooth project progression.
- Demonstrated **strong time management** by consistently **meeting project deadlines**, understanding their critical role in the industry.
- Gained valuable technical skills in frontend development, along with soft skills such as communication, teamwork, and problem-solving through **active participation in team discussions and feedback sessions**.

Skills

Languages : Java, SQL,Javascript,Typescript

Frontend: Html, Css, Reactjs,Bootstrap,Tailwind CSS,Nextjs

Backend: Express.Js , Node.Js, MongoDb, ,Mysql

Technologies and tools: Git,Github,Postman,VsCode,Intellij,Vercel,Docker

Projects

Zwigato   March. 2024 - April 2024
DemoUser: kb@gmail.com DemoPass:kb
Food Ecommerce Webapplication   *MongoDb | Nodejs | Reactjs | Expressjs | Vercel | Render| Git | Github*

- Independently developed an E-commerce platform for online food ordering.
- **Enhanced user experience by 70%** through **Razorpay** payment gateway integration, improving the payment process and increasing trust and security.
- Designed a scalable and **robust cross-platform** application..
- Utilized the **MERN stack** and **Git version control** to facilitate efficient development and collaboration.

Kverse   Jan. 2024
npm package for UI Components   *npm | Nodejs | Git | Github | Vite | Reactjs*

- Conceptualized and **implemented a comprehensive UI components library**, enhancing the visual appeal and user experience of React applications.
- Designed and developed a variety of reusable UI components including **buttons, cards, forms, and toggle switches.**
- Utilized modern web technologies such as React, JavaScript, and CSS for component development.
- **Published the package on NPM**, making it publicly available and easy to install for React developers.
- Actively **engaged with users, collecting feedback** and iterating on the package to incorporate improvements and new features.

Education

Guru Gobind Singh Indraprastha University   Expected graduation date: Nov. 2026
BTech. in Computer Science and Engineering | *GPA: 8.022/10*
